

# South Carolina Department of Probation, Parole & Pardon Services

Annual Statistical Report

Fiscal Year 2005

## Message from the Director

---

The Fiscal Year 2004-05 Annual Statistical Report is attached for your review and reference. This report provides a basic statistical representation of the work of more than 711 agents and employees of this Department. While there have been many challenges over the course of the year, I am pleased to report that more than sixty-five out of every hundred offenders successfully completed supervision. The Bureau of Justice Statistics of the U.S. Department of Justice (2001) reported nationally that approximately 62% of 3.9 million offenders had successfully met the conditions of their supervision.

The South Carolina Department of Probation, Parole and Pardon Services operates its offender programs within a clear framework of public safety in supervising the 48,848 offenders who were under the legal jurisdiction of the Department in FY 05. The Department promotes public safety and offender compliance through ensuring that our interventions promote the offender's ability to make positive changes in his or her life. In addition, our interventions are responses focused to address present or potential problems that may interfere with the successful completion of supervision.

The following tables provide a description of the offender population and answer some of the more commonly asked questions regarding the Department's programmatic efforts. Each table is preceded by a short description of its contents.

For the reader who wishes additional information or clarification, please do not hesitate to contact Tony Dukes, Research Director of the Office of Program Development and Grants Management at 734-3503.

Sincerely,

A handwritten signature in black ink that reads "Samuel B. Glover". The signature is written in a cursive style.

Samuel B. Glover  
Director

## To the Reader

---

The reader should be aware, that there are different ways of reporting units of data depending upon the purpose. Admissions include only those offenders admitted to SCDPPPS who had no other active cases at the time of admission. Closures information reflects only the last order to close during the fiscal year. Actives represents only those offenders who were active on June 30, 2005.

At the end of FY 2004-05, there were 48,848 offenders who were under the legal jurisdiction of the Department. Legal jurisdiction includes offenders who have been transferred out of state, absconded with active warrants, and others who are not under the active day-to-day supervision of the Department. At the end of the fiscal year 32,624 offenders were under active supervision of the Department.

In addition, due to rounding, some of the totals will not equal 100%. Where possible, missing data or rounding has been indicated.

## Total Population

---

Tables 1-A through 9-A and Figures 1-2, represent admissions to the Department of Probation, Parole and Pardon Services (SCDPPPS) over FY 04-05. These tables count admissions to a particular sanction, and include only those offenders admitted to SCDPPPS who had no other active cases at the time of admission. These tables also include only the main case even though an offender may have been admitted with more than one case. In FY 04-05, there were a total of 19,386 admissions. A state and county total is provided for each category of admission. Within the racial categories, due to the small number of offenders classified as "Hispanic, Native American, or Other", they have been grouped together and classified as "Other".

Table 1-A provides information on total admissions by program status. The counties of Charleston, Greenville, Richland and Spartanburg contributed the largest number of total admissions, together accounting for 33% of all admissions.

Table 2-A presents information on total admissions by type of offense, violent versus non-violent. Violent refers to those offenses as defined by the Omnibus Crime Act.<sup>1</sup> Total admissions during FY 04-05 were predominately non-violent with very few admissions (6%) for violent offenses.

Table 3-A and Figure 1 illustrates total admissions by gender and race. Admissions overall continue to be predominately male, 82%, with a racial composition of 55% black, 43% white, and 2% other.

Table 4-A and Figure 2 describe all active offenders by level of supervision on June 30, 2005. This total does not include new and unclassified offenders, or indirect supervision offenders, such as those incarcerated on split sentences. The level of supervision determines how often the offender is seen by the Agent. Among all offenders, high level supervision represented 26%, administrative supervision represented 70%, followed by intensive supervision at 4%.

<sup>1</sup>Murder, Armed Robbery, Attempted Armed Robbery, Kidnapping, Carjacking, Criminal Sexual Conduct 1st and 2nd degree, Criminal Sexual Conduct with a Minor, Assault with Intent to Commit Criminal Sexual Conduct 1<sup>st</sup> or 2<sup>nd</sup> degree, Engaging a Child for Sexual Performance, Assault and Battery with Intent to Kill, Voluntary Manslaughter, Drug Trafficking (44-53-370 e), Arson 1<sup>st</sup> and 2<sup>nd</sup> degree, Burglary 1<sup>st</sup> degree, Burglary 2<sup>nd</sup> degree with Aggravating Circumstances, or Accessory Before the Fact to any of the above crimes.

Table 5-A shows total closures by type (successful or unsuccessful). Closures include only those offenders in which all cases have completely closed out from SCDPPPS. Only the last order to close during FY 04-05 and within that order only the main case, even though an offender may have had more than one case, is included. The overall success rate for all offenders closing during FY 04-05 was 65%. The unsuccessful rate, 35%, is defined as those offenders whose supervision was revoked due to a technical violation or new offense and those instances when the offender was sentenced to prison on a new offense.

Table 6-A presents the relationship between the number of high risk males (ages 17-34) in a county and the number of those males admitted to community supervision. This table illustrates that statewide, for every one thousand males age 17 to 34, 20.4 were admitted to the supervision of the Department of Probation, Parole and Pardon Services. County rates range from a low of 10.0 to a high of 36.1. This number is limited to new admissions for the fiscal year and does not reflect the percentage of active offenders in this age category.

Table 7-A demonstrates the relationship between the number of high risk females (ages 17-34) in a county and the number of those females admitted to community supervision. This table illustrates that statewide, for every one thousand females age 17 to 34, 4.0 were admitted to the supervision of the Department of Probation, Parole and Pardon Services. County rates range from a low of 0.4 to a high of 8.1. This number is limited to new admissions for the fiscal year and does not reflect the percentage of active offenders in this age category.

Table 8-A shows drug testing activity during FY 04-05. This table represents the number of individual offenders tested, the number of individuals testing positive, the number of times offenders were tested, and the total number of positive tests.

Table 9-A describes offender admissions by age category.

*Probation*

## Probation

---

PROBATION: The Department is charged with the responsibility of supervising those offenders placed on probation by the Court. Probation is a court-ordered community sanction which suspends the imposition of all or part of the original sentence of incarceration. It requires the offender, under SCDPPPS supervision in the community, to adhere to a set of conditions which limit the offender's freedom, reparation to victims if so ordered, and to provide for judicial revocation for violation of those conditions.

Tables 1-B and 2-B represent all probation admissions during FY 04-05. Probation includes regular probation, intensive probation and offenders admitted to probation supervision from a split sentence from prison.

Table 1-B breaks down probation admissions in terms of offense type, violent versus non-violent. For FY 04-05 statewide 3% of all probation admissions were for violent offenses.

Table 2-B provides information on probation admissions by gender and race. Probation admissions were predominately male, 79%, with a racial composition of 52% black, 2% other, and 46% white.

Table 3-B and Figure 3 describe the active probation offender population in terms of level of supervision on June 30, 2005. This table does not include new and unclassified offenders or indirect supervision offenders, such as those incarcerated on split sentences. Among probationers, high level supervision represented 27%, administrative supervision represented 71%, followed by intensive supervision at 2%

Table 4-B provides data for probation closures by type (successful or unsuccessful). The overall success rate for probationers (65%) was the same as the success rate for the total offender population (65%).

Table 5-B reflects probation admissions by age category.

## Parole

---

PAROLE: The Department is charged with the responsibility of supervising those offenders paroled by the SC Board of Pardons and Paroles. Parole is the conditional release of an individual from imprisonment, but not from the legal custody of the state, to complete his/her sentence outside a correctional institution under conditions and provisions of supervision determined by the Board. Should an individual be granted parole, he/she must agree to abide by certain conditions of community supervision. The violation of any of these conditions is sufficient grounds for revocation of parole by the Board, and the imposition of the remainder of the original sentence of incarceration.

Tables 1-C and 2-C pertain to data on all parole case admissions for FY 04-05. Parole includes regular parole, intensive parole and provisional parole. One hundred thirty eight (138) early release offenders were also included in parole for FY 04-05.

Table 1-C shows parole admissions by type of offense. A larger percent of parole admissions, 27%, fall into the violent category, as compared to 3% for probation admissions and 2% for YOA admissions.

Table 2-C describes all parole admissions by gender and race. Parole admissions consisted primarily of males, 89%, with a racial composition of 66% black, 2% other, and 32% white.

Table 3-C and Figure 4 describe active parolees by level of supervision on June 30, 2005. This figure does not include new and unclassified offenders. Among parolees, administrative supervision offenders represented 66% of the parolee population, followed by high level at 22%. Intensive supervision accounted for 12% of the parolee population.

Table 4-C presents parole case closures by type (successful or unsuccessful). The overall success rate for parolees (81%) was somewhat higher than that of probationers (65%).

Table 5-C describes the parole population by age category.

## Youthful Offender Conditional Release

---

**YOUTHFUL OFFENDER CONDITIONAL RELEASE:** Inmates ages 17 through 24, sentenced under the state's Youthful Offender Act (YOA) to an indeterminate period of incarceration (not to exceed six years) within the S.C. Department of Corrections (SCDC), may be conditionally released prior to that time, based on offense, category, adjustment and evaluation while incarcerated. While under SCDPPPS supervision, these offenders remain under the jurisdiction of SCDC.

Tables 1-D and 2-D present data on all YOA case admissions for FY 04-05.

Table 1-D displays YOA admissions by type of offense. YOA violent admissions at 2% are smaller than those admitted to probation at 3%.

Table 2-D illustrates YOA admissions by gender and race. YOA admissions were predominately male (97%) and black (70%).

Table 3-D and Figure 5 describe the active population for YOA conditional release in terms of level of supervision on June 30, 2005. Twenty three percent (23%) are supervised at a high level. Intensive level supervision accounted for 21%, while 56% are supervised at administrative level.

Table 4-D shows YOA offenders are more inclined to close unsuccessfully (52%) than parolees (19%).

Table 5-D describes YOA admissions by age category.

*Section E*  
*Violations*

## Violations

---

**VIOLATIONS:** Offenders charged by their supervising agents with violations of the conditions of supervision are reviewed through an administrative hearing process to determine if probable cause of a violation exists. If a violation is found, a determination is made as to which community sanctions should be imposed, or whether the case should be referred to the Board or the Court for revocation action.

Table 1-E provides data by county on the violation process. Statewide, a total of 4,764 violation hearings were held. At those hearings, 2,396 cases were continued or recommended for continuation, while 2,368 cases were revoked or recommended for revocation.

Table 2-E provides a comparison of changes in active population and the type of closure for FY 99 to FY 05.

# *Summary*

## Summary

---

Chart 1 summarizes the population characteristics of SCDPPPS offenders by supervision programs, Probation, Parole and YOA as well as offender involvement in drug testing.

The proportion of violent offenses among YOA admissions and probationers during FY 04-05 was small, ranging from 2% to 3%, with the percentage of violent offenses for parole admissions at 27%, higher than for any other offender category.

Overall, the most utilized level of supervision was administrative (70%), followed by high (26%), and intensive (4%) for all cases.

The overall success rate for closures was 65% during the fiscal year. The overall success rate for parolees was 81%. Both probationers (65%) and YOA offenders (48%), had less successful closures rates than parolees.

Of the 14,286 offenders that were tested for drug use while under our supervision, 5,818, or 40.7%, tested positive for drugs.

Chart 2 compares the number of admissions for each fiscal year from 1987 to 2005. Admissions increased for FY 04-05 by 20.7% from the previous fiscal year, the highest number of admissions since FY 01.

Chart 3 displays violent admissions by program for fiscal year 1993 to 2005. Due to the small number of early release offenders for FY 04-05 they were included in parole. YOA offenders showed a slight decrease in violent admissions over the previous fiscal year.
